

On-Site Operator Training

Your operators play a critical role in your machine performance. Maximize your equipment lifespan with operator training from STERIS. This program ensures your team is proficient in the safe, consistent and efficient operation of your equipment.

What to Expect

Led by an experienced STERIS Service Representative, this training will cover important topics:

- Safety protocols
- Equipment components
- Alarm identification and response
- Standard operating procedures
- Test cycle execution and monitoring

This program is customized to meet your requirements and should be repeated as needed.
